

Dear NAME,

My name is NAME. I am a MOTHER/FATHER of NUMBER children in the school district. All of my children in school are under the age of 12 years old.

I am writing to let you know that my family and I oppose the State's mandate for vaccinations for kids. I know several people, some of whom are my employees that are vaccine injured. Please oppose for the following reasons:

The District Does Not Have Legal Authority to Mandate COVID-19 Shots.

The District Cannot Mandate an EUA Product.

Any policy mandating these shots is not a public health policy, but rather an order to take medicine as a condition for in-person schooling. Prescribing, or even promoting, medicine constitutes the practice of medicine under California law, and practicing medicine without a valid medical license is a crime under Penal Code, Section 2052.

The District Is Exposed to Unfettered Civil Liability

The shots do not prevent the transmission of SARS-CoV-2.

The shots expose our community to greater risks. The CDC's own data demonstrates that the injuries to vaccines outnumber the COVID-19 injuries.

The District lacks any authority to bypass existing California and federal law and impose an experimental vaccine upon children entrusted in its care to enroll a clinical trial as a condition to attending school

I have met with over thousands of like-minded individuals in the past 24 hours who share the same concern as I do. We cannot rationalize any reason why our District would want to expose itself in this way and put the children in its district in harm's way. It cannot be the "health and safety" of our community given all of the data we currently have, to date, including but not limited to testimony and data presented at the September 17, 2021 FDA Advisory Committee Hearing wherein the Committee "overwhelmingly rejected" the White House's plan to give Pfizer shots to most Americans, citing "lack of safety data" and "doubting the value" of mass boosters, especially for children 16 years and up.

The District lacks any authority to bypass existing California and federal law and impose an experimental vaccine upon children entrusted in its care to enroll in a clinical trial as a condition to attending school. Therefore, please retract and issue a decision permanently banning any such mandates in the future. If the District chooses to move forward with and vote on the Resolution, it must integrate these comments into the hearing minutes, as required by law. Please confirm receipt of this letter and that these comments and concerns will be integrated into your discussion on the Resolution and your decision making.

Sincerely,  
NAME
