School Board Meeting Resource Package Expert Commentary, Talking Points & Resolution Template

This package is a powerful tool to assist in winning this fight against the vaccine mandate on our children. Provided in this package is the following:

- Talking Points on vaccine efficacy
- Downloadable videos (1-3 minutes in length) of subject matter experts in the field of science and medicine related to these vaccines that can be used during public comments or shared online
- Proposed Resolution for your school board to end to Governor Newsom

Talking Points

We highly recommend sticking to these narrowly tailored talking points when speaking to school board members (or anyone really) to avoid going down a rabbit hole argument.

- Pursuant to the CDC, the fatality rate for children from COVID-19 nationwide is .00003% and the state average for California on a seven-day rolling basis is 0%. Accordingly, children are not warranted to be vaccinated for COVID-19. Furthermore, pursuant to a study conducted by Dr. Martin Makaray of Johns Hopkins hospital on CDC reported deaths of children, all had underlying comorbidities. Therefore, not one healthy child has died of COVID in the U.S.
- Pursuant to the CDC, the CDC Director and Dr. Fauci in his New York Times November 12 interview, the COVID-19 vaccine will not prevent infection or transmission of the COVID-19 virus, nor will it prevent serious injury, hospitalization or death any longer. Therefore, the vaccine is not the best tool for prevention of transmission - it does not promote public health. It is a medical treatment, at best. As such, it cannot be mandated as treatments are a personal medical choice pursuant to the state and federal Constitutions. The vaccine is not effective.
- Pursuant to the FDA, the vaccine manufacturers, and multiple scientists across the nation and the world, these vaccines pose grave risks of severe myocarditis, blood clotting, and neurological damage to name a few, predominantly prevalent in adolescents. As such, the risks of taking the vaccine significantly outweigh the benefits especially as it pertains to the pediatric community. The vaccine is not safe.

Videos

We are aware that parents only have 1 to 3 minutes to speak at these meetings, so we have taken the liberty of having Dr. Paul Alexander, epidemiologist and our chief scientific officer, record short, informational videos you can share online or at your local school boards during public comments. We've segmented these videos and labeled them so that several parents can play different video clips on their phone at the meeting in lieu of speaking themselves.

Bio: Dr. Paul E. Alexander

Dr. Paul E. Alexander, an esteemed epidemiologist and a widely recognized global expert on COVID-19, is chief scientific officer of the Unity Project. He has previously served as senior advisor to the assistant secretary of the U.S. Department of Health and Human Services specializing in COVID pandemic policy to the White House. Dr. Alexander has also worked with the World Health Organization/Pan American Health Organization as a COVID pandemic evidence-synthesis advisor and is a former assistant professor at McMaster University in evidence-based medicine and research.

Videos to download:

- [SchoolsSafeNew.mp4](#) (1 minute 4 seconds)
- [NoChildShouldBeVax'd.mp4](#) (56 seconds)
- [KidsVaxAllRiskNoBenefit.ACE2.mp4](#) (1 minute 38 seconds)
- [VAERSNew.mp4](#) (35 seconds)

Additional video resource:

We recently hosted a video podcast discussing the data and science of the vaccines and the pediatric community.

Featured experts:

- Dr. Kirk Milhoan, MD - Pediatric Cardiology
- Dr. Mark McDonald, MD - Child Psychiatrist
- Dr. Robert Malone - Inventor of the mRNA vaccine platform used in the Pfizer and Moderna Covid-19 vaccines

Resolution

We recognize this resolution will be a tough one to sell, hence we have offered it in Word format so that your respective board members can amend it as they see fit. It is proposing non-compliance to the vaccine mandate. Our goal is to get as many districts as possible to send these resolutions to the Governor before the Senate and the Assembly back into session in January in hopes that he will rescind the proposed mandates. Please note, this Resolution does not bind the school district or its board members to its contentions. In other words, they can change their minds, but we hope they won't. Please let the board know that we will help in their legal defense should they agree to NOT COMPLY.
